Sandbanks Sand Dunes Consultation

Sandbanks Sand Dunes play a vital role in protecting the coastline from erosion and supporting rare and protected species. However, the dunes also face pressures including storm damage, visitor trampling, accessibility issues and wind blown sand affecting nearby paths and properties.

After extensive engagement with residents and key stakeholders, BCP Council has developed draft proposals for how these dunes could be managed in the future. We are now seeking your views before any decisions are made.

Have your say

Your views will help inform how we will manage the dune systems in the future.
